 [CRITICAL] High model-impact drift on 1 feature(s)

Source agent **data_drift**
Remediation type **retrain**
Detected at 2026-08-30T18:05:39.490076+00:00

Affected features: Glucose.

- Glucose: 'Glucose' is at the 88th percentile of SHAP importance among tracked features (threshold=75th, raw importance=0.5135): the drift directly affects predictions.

Recommended action:

FINAL VERDICT -- retrain: batch is clean (no missing-value spike, no new category) on the drifted feature(s), so this is a genuine population shift, not a data-quality artifact.

Prioritize Glucose (direct model impact per SHAP). Check for a root_cause alert this cycle before scheduling the retrain.

drift_percentage 25.0
features ["Glucose"]
psi_scores {"Glucose": 0.10221126392984858}
shap_adjusted true
